Approach to risk management

Effective risk management is paramount for and underpins AerCap's business strategy. AerCap's appetite for risk is a carefully calibrated part of the business model aligned to the company's strategic and corporate objectives. Our ongoing tax risk approach is based on principles of reasonable care and materiality. Part of our tax risk management process is to have effective controls across the business.

The AerCap Tax department consists of tax professionals who collectively have the appropriate level of knowledge and skills to manage AerCap's tax affairs and monitor tax risks across the business.

Professional advice is obtained from suitably qualified external advisors where the tax treatment of specific items is uncertain or complex. This policy prescribes compliance with all relevant laws, rules, regulations, reporting and disclosure requirements in a manner that achieves the tax risk approach.

Attitude of the AerCap UK Companies towards tax planning:

AerCap strives to provide a long-term return to our shareholders and therefore we seek to structure our business in an efficient manner. We do not interpret tax laws in a manner that we believe is contrary to their intention and we do not undertake tax planning unrelated to commercial transactions.

Level of risk in relation to UK tax that the companies are prepared to accept

AerCap is not prescriptive in terms of levels of acceptable risk. However, in accordance with our governance framework and approach to risk management, AerCap's level of acceptable risk is assessed based on the specific facts and circumstances.

Due to the cross-border nature of our business, we are cognisant of potential risks which could arise. Therefore, the AerCap Tax department assists each AerCap UK Company in actively identifying, monitoring and managing tax risks on an ongoing basis.
